

# Re-evaluating A Job Search Interface

## Shane Brenizer, UI Designer

iHire, Inc.

**BACKGROUND:** A Maryland-based company trying to compete with the major players such as Monster and Dice.

**PROBLEM:** Job seekers had a difficult time understanding the many options available to them. The website needed to be less cluttered and more intuitive.

**SOLUTION:** After performing a heuristic analysis on current website, Shane Brenizer advised on solutions to each interface problem, created wire frames and created an HTML prototype that contained CSS and plenty of comments for programmers to easily understand.

The interface before changes from Shane Brenizer.

An HTML mock-up of the design by Shane Brenizer.
